

NHE3 Antibody

Catalog # ASM10476

Specification

NHE3 Antibody - Product Information

Application Primary Accession Other Accession Host Reactivity Clonality **Description** Rabbit Anti-Rat NHE3 Polyclonal

WB, ICC <u>P26433</u> <u>NP_036786</u> Rabbit Mouse, Rat Polyclonal

Target/Specificity Detects ~84kDa.

Other Names

SLC9A3 Antibody, Na+/H+ exchanger 3 Antibody, isoform 3 Antibody, Solute carrier family 9 member 3 Antibody, NHE3MGC126720 Antibody, MGC126718 Antibody, solute carrier family 9 (sodium/hydrogen exchanger) member 3 Antibody, NHE-3 Antibody, Na(+)/H(+) exchanger 3 Antibody, Sodium/hydrogen exchanger 3 Antibody

Immunogen Synthetic peptide mapping to AA 809 to 831 of rat sequence

Purification Protein A Purified

Storage Storage Buffer PBS, 50% glycerol, 0.09% sodium azide

-20°C

Shipping TemperatureBlue Ice or 4°CCertificate of Analysis1 μg/ml of SPC-400 was sufficient for detection of HNE3 in 10 μg of rat kidney tissue lysate by
colorimetric immunoblot analysis using Goat anti-rabbit IgG:HRP as the secondary antibody.

Cellular Localization Membrane

NHE3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry

- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

NHE3 Antibody - Images

NHE3 Antibody - Background

Sodium-hydrogen exchanger 3 (NHE3; Slc9a3) is an epithelial transport protein that carries out 1:1 exchange of Na+ and H+ across the plasma membrane. It is apically located in the proximal tubule of the kidney, the thick ascending limb of the kidney, and in small intestine (1). NHE3 is phosphorylated and regulated by multiple kinases including PKA, SGK1 and CK2. It can be phosphorylated by calyculin A, and dephosphorylated by PP1 catalytic subunit in vitro (2).
