

Normal Sheep serum blocking buffer

#Cat: NB-23-00191-2

Size: 18mL

#Cat: NB-23-00191-1

Size: 100mL

Intended use:

Storage: 2-8C

Normal Sheep Serum Blocking Buffer is used in immunohistochemical staining procedures to block non-specific staining when the host species of the secondary antibody is Sheep.

Component:

Catalog No	Size
NB-23-00191-2	18mL (Ready to use)
NB-23-00191-1	100mL (Ready to use)

Solution contains 0.05% NaN₃.

Recommended protocol:

1. Apply 100uL or enough volume of **Normal Sheep Serum Blocking Buffer** on tissue before adding primary antibody and incubate for 10 minutes at room temperature.
2. Blot off Normal Sheep Serum Blocking Buffer Solution (Do not rinse) and add primary antibody
- 3.

Precaution:

Wear gloves and take other necessary laboratory safety procedure.
