

## Universal Detachment Solution

Cat# NB-26-01692

### Description

---

Universal Detachment Solution

### Product Informations

---

**Catalog #:** NB-26-01692

**Product Size:** 100 ml

**Storage:** 2°C-8°C

**Product Format:** Liquid

### GENERAL INFORMATION

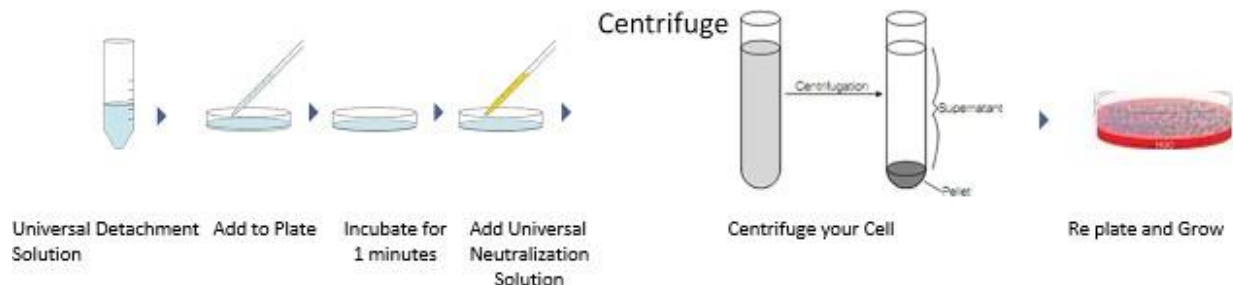

---

Universal Detachment Solution is a superior alternative to Trypsin/EDTA for gently detaching adherent cells from in vitro growth vessels. Detaching provides quick, gentle, and effective detachment of a wide variety of adherent cells, including primary cells, from all known tissue culture plastic ware.

### PRODUCT FEATURES

---

- Does not contain mammalian or bacterial derived products
- Comprised of collagenolytic and proteolytic enzymes
- Performs well when detaching cells for the analysis of many cell surface markers using flow cytometry and for cell sorting
