

PlateReady™ BHK-21 96 Well Plates

REF: BHK20096PSCLHIG

For research use only. Not for use in diagnostic procedures.

Description

PlateReady™ BHK-21 96 Well Plates contain adherent fibroblasts isolated from an uninfected golden hamster. The cells are cryopreserved directly adhered to 96 well plates with the use of CryoLogyx's patented CryoShield™ formulation. The BHK-21 [13] cell line is a well characterised cell line that has been widely used in viral replication studies and testing Virucidal efficacy of different formulations (EN14476).¹ PlateReady™ BHK-21 96 Well Plates are compatible with all major assays 24 hours after thawing. Over 80% cell viability is expected post-thaw, with cells retaining healthy morphology, immediate proliferative capacity, metabolic activity and membrane integrity.

PlateReady™ BHK-21 96 Well Plates is provided at one confluency levels:

- High (BHK20096PSCLHIG), > 70% confluency, ~40k cell per well

Application Notes

PlateReady™ BHK-21 96 Well Plates can be used to replace conventionally cultured cells for all major assays.

[Application Notes](#) for the following assays are available:

- Substance/Drug IC₅₀ value determination

Product Specification

PlateReady™ Plates

Simplifying and accelerating cell-based assays

Content

Cryopreserved adherent BHK-21 cells in a 96 well plate. Each well contains 100 µL of CryoLogyx's proprietary cryoprotectant formulation.

No cells are present in rows A and H and columns 1 and 12 to avoid assay edge effects (blue on diagram).

Plate Dimensions

The 96 well plates used to produce PlateReady BHK-21 96 Well Plates are sourced from Greiner Bio-one (catalogue code 655180). The plate dimensions without a lid are 127.5 mm (L) x 85 mm (W) x 1 mm (H). The exact [dimensions](#) and [datasheets](#) can be found on the Greiner Bio-one website.

Receipt & Storage

Product shipment: Dry ice. Upon receipt, confirm that dry ice is covering the PlateReady™ BHK-21 96 Well Plates.

Product storage: immediately transfer to -80 °C freezer. Note: Storage at higher temperatures (>-80 °C) may affect the expiry date stated on the packaging.

Product use: Consult the "[General Thaw-and-Use PlateReady™ BHK-21 96 Well Plates Protocol](#)" when thawing. Thawed products cannot be re-frozen.

	Expiry date

Packaging & Plate Information

Information on packaging: Reference number, lot number, expiry date, Quickstart guide, QR code for further detailed instructions.

Information on well plate: cell type, passage number and lot number encoded barcode

Precautions

This product is for professional laboratory use only. The data and results produced using PlateReady™ BHK-21 96 Well Plates should not be used for diagnostic purposes, therapeutics or human and animal consumption.

Product Specification

PlateReady™ Plates

Simplifying and accelerating cell-based assays

PlateReady™ BHK-21 96 Well Plates utilise BHK-21 [13] cells sourced from ATCC (CCL-10™). BHK-21 cells are classified as BSL 1 and are of minimal risk to the user. However, it is the users responsibility to understand the hazards associated with the material per the organisation's policies and procedures as well as any other applicable regulations enforced by your local or national agencies.

CryoLogyx highly recommends that appropriate personal protective equipment is used when removing the plates from dry ice shipping and handling plates stored at -80 °C.

Certificate of Analysis

Certificate of analysis is available on delivery and can also be requested at www.cryologyx.com or by email at info@cryologyx.com.

Warranty

CryoLogyx possesses a limited warranty restricting our liability to replace this product. CryoLogyx does not provide any other warranties of any kind, expressed or implied. However, our customer service team are willing to deal with requests case-by-case.

Proprietary Information

The recipient of PlateReady™ BHK-21 96 Well Plates agrees to use the product for the purposes of conducting assays and not to subculture or give them to a third party.

The cryoprotectant formulations used to produce CryoLogyx products are covered by patents which is the property of CryoLogyx and the University of Warwick. Use of the cryoprotectant formulation or any attempt to reverse engineer the formulation is an infringement of these patents unless CryoLogyx has provided written permission.
