

## dNTP Mix (10mM)

#Cat:NB-03-0136

Size: 1ml

Concentration: 10mM each

Store at -20°C

For research only In total 1 vial.

### Description

dNTP Mix is aqueous solutions at pH 7.0 containing dATP, dCTP, dGTP and dTTP, each at a final concentration of 10 mM. dNTP mix is ready-to-use solutions designed to save time and to provide higher reproducibility in PCR and other applications. The Mix offers the possibility to reduce the number of pipetting steps and the risk of reaction set up errors.

### Applications

For direct use in PCR, long PCR, RT-PCR, cDNA synthesis, primer extension, DNA sequencing and DNA labeling.

### PRODUCT USE LIMITATION.

This product is developed, designed and sold exclusively for research purposes and invitro use only. The product was not tested for use in diagnostics or for drug development, nor is it suitable for administration to humans or animals.
